

# ORE3541M

## WHITE HULLED MILLING OAT

**SeCan**

Canada's Seed Partner

## Characteristics

<b>Yield</b>	High
<b>Straw Strength</b>	Strong
<b>Maturity</b>	Average
<b>Height</b>	Short

## ORE3541M

ORe3541M is a short strong strawed white hulled milling oat with good grain yield potential and very plump seed. ORe3541M is the 1st of 2 new oat varieties from Oat Advantage, a new private breeding program near Saskatoon, SK. ORe3541M is well suited for production across all of western Canada.

### PBR 91 Protected

**Approved for Milling** - Contact your local processor/handler for details in your area

## Strengths

- High percent plump seed greater than all checks but slightly lower plump than ORe3542M
- Very low percent thins, lower than all the checks
- Very high test weight, greater than all the checks and ORe3542M
- Very good lodging resistance
- Short strong straw, shorter than all the checks and slightly shorter than ORe3542M
- Resistant to crown rust and smut
- White hull

\* Weakness: Moderately susceptible to BYDV

\* Susceptible to stem rust

## NEUTRAL TRAITS

- Similar maturity to the checks, earlier maturing in Manitoba
- Grain yield equal to the average of the checks
- Average groat percentage, slightly lower than the average of the checks but greater than ORe3542M

### Breeder

Jim Dyck  
Oat Advantage  
Saskatoon, SK

## 2013-2014 Western Cooperative Oat Test
