

AAC BRIGHT

YELLOW FLAX

Canada's Seed Partner

Characteristics

Yield High

Straw Strength Strong

Maturity Long

Height Tall

AAC BRIGHT

AAC Bright is a high yielding yellow seeded flax variety with very good lodging resistance, small seed size and later maturity.

Adaption: All flax growing areas of western Canada, especially the longer growing season areas.

Pedigree: M6155/CDC Bethune

"This variety is exclusively licensed to NDCISA, any unauthorized propagation is prohibited."

Strengths

- 112% grain yield of AC Nugget and 94% of CDC Bethune across all zones in the western flax registration trials
- Very good lodging resistance
- Resistant to flax rust and moderately resistant to fusarium wilt
- Higher oil content compared to the checks

* Weakness: 2 day later maturing than CDC Bethune

* AAC Bright, like most other yellow flax varieties, expresses a low percentage of brown seed that may need to be managed at processing

NEUTRAL TRAITS

- Higher iodine number compared to CDC Bethune but slightly lower compared to AC Nugget
- Meal protein slightly lower than AC Nugget
- Slightly larger seed than AC Nugget
