

CDC ROWLAND FLAX

Characteristics

Yield	High Potential
Maturity	Late
Seed Color	Brown
Seed Size	Large

CDC ROWLAND

CDC Rowland is a large, high yielding brown seeded flax variety with very good lodging resistance and late maturity. All flax growing areas of western Canada, with especially good performance in the long season areas of the black and brown soil zones.

Parentage: CDC Sorrel/F03279//CDC Sorrel/F03279

STRENGTHS

- Good Resistance to Lodging
- Resistant to Flax Rust and Moderately Resistant to Fusarium Wilt and Powdery Mildew
